

To whom it may concern:

I worked with Jackie Schaffer while I was Director of Operations for a subspecialty cardiology practice in Cincinnati. Jackie was the Executive Director for a large group of family practice physicians. Jackie and I worked collaboratively on several projects over the course of 3 years, which included incorporating Nuclear Stress Testing as an ancillary service at her practice.

As an Executive Director, Jackie was extremely professional, dependable and forward thinking while in her role at the practice. Jackie always had the best interest of the practice in mind. She was able to face problems and take care of things proactive manner. We became mentors to each other as we often meet to review strategic ideas that we were working on at our individual practices.

I highly recommend Jackie to any future employer.

Sincerely,

Jennifer Baker, MBA
