Whom this may concern:

Jackie Schaffer was my supervisor on two separate occasions. She hired me while she was an office manager for a large psychiatric doctor's office. She again hired me to work with her while at Medical Manager/Web MD.

Over the years of ours worked together, she was an outstanding supervisor to work for. She was always professional & took all necessary steps to further herself. She always took the extra time to train/mentor me which help in the success of my own career. This is a characteristic which as an employee I valued.

Jackie is an intelligent and motivated individual. She would be a positive impact to any business.

Sincerely,

Christ Raye
